

Saab was Born from Jets, nurtured by GM, and will soon graduate into Koenigsegg; a world renowned car manufacturer of some of the most prestigious driving machines in the world. If you love your SAAB, imagine what's ahead with all the increased performance and safety features, exciting new design renovations, and environmentally responsible considerations. Christian von Koenigsegg, the founder of Koenigsegg Automotive AB leads Koenigsegg Group, and its vision to revitalize the SAAB brand and transform SAAB Automobile into a standalone independent company. Furthermore they have an agreement with a BAIC who will become a non-controlling minority shareholder in Koenigsegg Group. Koenigsegg Group will own 100 per cent of SAAB Automobile AB. BAIC is growing fast with a year on year growth rate of 42.2% and expected to reach 1.13 million vehicle sales this year. In addition, they are proving to be one of the most competitive auto groups in the world, boasting a diverse product portfolio of passenger cars, SUVs and commercial vehicles. During this transition GM will continue to be involved, do you blame them? We at SAAB of Troy and SAAB of Lakeside are exited about what the future will bring with exciting new designs of the all new 2010 9-5 and the new 9-4 Crossover. We invite you to come to our showroom and test drive a Saab to see why people who test drive a Saab, usually buy a Saab.

Welcome to the Saab State of Independence!

Sincerely,

Tony Malouf
